AI BLOGNEST API

Brainstorming & Idea Prioritization

Selecting capabilities for an AI-assisted blogging API

TEAM ID	SWTID 2026-5569
TEAM SIZE	5

DATE	30 September 2026

Opportunity

Writers need a backend to manage blog posts and use generative AI to draft and summarize content.

Ideas considered

• Register, log in, and retrieve a protected profile.

• Create, read, update, and delete blog posts.

• Organize posts with categories.

• Generate blog content from a topic and category using Gemini.

• Summarize submitted blog content with Gemini.

Priorities

Implement authenticated user access and blog persistence first; add blog management; then expose AI generation and summarization as API operations.

Scope

The supplied project context describes a Node.js/Express/MongoDB backend. A full web frontend, publication workflow, analytics, and hosting are not documented here.
