Authentication

Registration, login, JWT use, and profile retrieval are part of the stated project scope; shared local terminal output shows successful example responses.

Blog API

Blog create and list operations are visible in shared Thunder Client screenshots. The overall project context describes blog CRUD; update/delete implementation details were not visible in these screenshots.

AI generation

POST /api/ai/generate-blog request includes topic and category and returned generated title/content with HTTP 201 in the shared screenshot.

Summarization

POST /api/ai/summarize request includes content and returned a summary with HTTP 200 in the shared screenshot.

Structure

Screenshot shows separate config, controllers, middleware, models, routes, and services directories, plus app.js and server.js.
