AI BLOGNEST API

Customer Journey Map

Typical user journey through AI BlogNest API

TEAM ID	SWTID 2026-5569
TEAM SIZE	5
TEAM	Nithesh D (Leader); Madhan P; Poovrasan K; Duraisamy M; Praveen Kumar R
DATE	30 September 2026

Start

Configure Node.js service, MongoDB connection, JWT secret, and Gemini key; start the API server.

Account

Register and log in; use the issued JWT when calling protected routes. Earlier terminal evidence showed registration 201, login 200, and profile 200.

Blog workflow

Create a blog post with title/content/category and retrieve blog records. Shared screenshots show a successful POST /api/blogs (201) and GET /api/blogs (200); the terminal showed six records fetched.

AI assistance

POST /api/ai/generate-blog accepts topic/category and returned 201 in the shared screenshot. POST /api/ai/summarize accepts content and returned 200.

Evidence limits

The screenshots document depicted local requests. They do not establish production deployment, broad test coverage, or performance guarantees.
